

FaceMask Example 1.1.5

About FaceMask Example

FaceMask Example is an **example project** that maps **face masks** to detected faces in images using [OpenCV for Unity](#) and [Dlib FaceLandmark Detector](#). This project demonstrates how to implement **real-time face mask overlay** by detecting facial landmarks and applying custom mask textures.

The execution of this asset is required [OpenCV for Unity](#) and [Dlib FaceLandmark Detector](#).
